## ABOUT THE CONFERENCE

New technological developments are very eagerly adopted and applied by the library and information science field. Around the globe, socioeconomic developments have always influenced the LIS profession. As a result of the data economy, artificial intelligence, big data internet of things and robotics, teaching learning, research, and industry have undergone drastic changes, and those changes are bound to impact on LIS practices. The purpose of this international conference is to shed light on the challenges and demands associated with future information systems. Currently, the library and information profession is facing a total role shift. As user engagement demands become more important as well as creative outcomes in academics and research, new services must be offered. This conference will identify, acquire, and polish with groundbreaking resourcefulness the current and future demands in librarianship and information science.

## ABOUT JAIPUR ENGINEERING COLLEGE & RESEARCH CENTRE

JECRC, Jaipur (INDIA) is among the pioneers in Rajasthan in imparting high quality engineering education in different streams. A journey of 25 years for JECRC, having more than 5000 students on campus under 8 UG programs, has earned laurels to their students, faculty members and for the institute in many ways. More than 15000 alumni's spread over the globe have climbed the ladder to leadership positions and provide mentorship to their juniors by way of skill development, incubation, startup, research and angel funding. Grants from government agencies for setting up centres of excellence, state of art facilities for startups, providing a platform to the students to develop their technical and managerial skills to get placement in reputed organizations. Also JECRC University was established in the year 2012 and at present more than 25000 students enrolled. Socially rich atmosphere at the campus enabling fourfold grooming of students that is recognized at National and International level and enabling students to work as interns with personalities recognized in their field of expertise. JECRC has become synonymous to placements and JECRCians have made their presence felt at every reputed company / government organization. To improve the quality of teaching learning, the institute on regular basis is getting the appreciations from Government and Non Government Organizations viz., NITTTR Chandigarh, National Board of Accreditation, Rajasthan Technical University, AICTE, ASSOCHAM, Computer Society of India, The Week, Outlook, India Today etc. and two programs Mechanical Engineering and Electronics & Communication Engineering are accredited by the National Board of Accreditation for providing outcome based education.

## TRACK

### Digital Archiving of Cultural Heritage

- Strategies for long-term preservation of digital collections.
- Crowdsourcing and citizen science in cultural heritage preservation.
- Metadata standards and digital curation best practices.
- Institutional repositories and sustainability concerns.

### Data Management and Library Analytics

- Using analytics for decision-making in library management.
- Data privacy and ethical data practices in digital libraries.
- Library-based data visualization and user behavior analysis.

### Artificial Intelligence in Library Services

- AI-driven information retrieval systems.
- Chatbots and virtual assistants for library helpdesks.
- Ethical considerations of AI implementation in academic libraries.

### User Experience and Digital Library Interfaces

- Designing intuitive and accessible library user interfaces.
- Personalization and recommender systems in library portals.
- Enhancing library engagement through UX research.

### Digital Literacy, Misinformation, and Information Literacy

- Teaching digital literacy in academic and public libraries.
- Addressing misinformation and fake news through library programs.
- Role of libraries in promoting lifelong learning and civic awareness.

### Open Access and Open Educational Resources (OER)

- Institutional policies for OER adoption and open access publishing.
- Challenges in OER sustainability and version control.
- Collaborations and platforms for open educational content.

### Big Data and Intelligent Information Systems

- Scalable architectures for big data processing in knowledge systems.
- Predictive modeling and analytics in research environments.
- Data mining techniques in academic information systems.

### Blockchain Applications in Information Systems

- Blockchain for secure academic credentials and library transactions.
- Smart contracts for library membership and access control.
- Technical and organizational barriers to blockchain adoption.

### AI and Machine Learning for Smart Systems

- Natural Language Processing for scholarly data extraction.
- AI for knowledge graphs and academic search engines.
- Machine learning for plagiarism detection and recommendation engines.

### Cybersecurity in Educational and Library Systems

- Securing digital assets and infrastructure in knowledge environments.
- Cyber risk assessment models for public access systems.
- Identity and access management in federated digital platforms.

### Augmented Reality (AR) and Virtual Reality (VR) in Education

- Applications of AR/VR for interactive learning and digital exhibitions.
- 3D immersive storytelling in archives and special collections.
- Evaluating user impact and effectiveness of immersive tech.

### IoT in Smart Campus and Library Spaces

- IoT-enabled environmental monitoring in library infrastructure.
- Sensor-based automation for space management and inventory.
- Privacy and surveillance concerns in smart academic spaces.

### Collaborative Platforms and Cloud-Based Knowledge Systems

- Real-time collaboration tools for academic resource sharing.
- Cloud computing for digital library scalability.
- Version control and archiving in collaborative digital repositories.
